# E30: *Visualise* Energy Flows

ecoCool sells Sustainability technologies, and our vision is a *Sustainable Revolution®*. Our Energy Flow Dashboard™ fuses energy flows in your home onto a visual display, allowing you perfect visibility of your energy. Control your air conditioning, energy use and costs.

E30 Dashboard   **E30** Controller

The tablet-sized E30 Energy Flow Dashboard™ & Controller – links to household systems like switchboard, solar, battery, air-conditioning, drinking water, grid & smart appliances, for 'energy visibility', programming and AI decision-making.

The E30 brings savvy, intuitive engineering analysis of energy in residences, particularly the solar-battery-air-water equation, to a visual dashboard, allowing the least technical savvy to be consummate energy managers of the home or business.
